Company Description:

With its scientific innovation and development potential and the practical relevance of its academic education, the TH Wildau is a sought-after partner for innovative small and medium-sized enterprises as well as large international companies.

The TH Wildau promotes the international exchange of students and scientists. To this end, the university works with around 70 partner universities around the world. The contacts range from traditional partnerships in Eastern and South Eastern Europe to collaborations in Asia, Latin America, the Arab world and Africa.

Since 2001, the TH Wildau has been one of the strongest research universities in Germany. Over 40 research groups are working on current topics in applied and basic research. The university has thus earned a recognized reputation as a center of excellence for important scientific disciplines. Research focuses include applied biosciences, computer science/telematics, optical technologies/photonics, production and materials, transport and logistics as well as management and law.

Sector: Research and Education
