### Company Description:

The company Winz Werkzeugmaschinen Fabrik GmbH was founded in 1993 under the then name Winz & Lemke GmbH. Thanks to many years of experience at the company Berliner Werkzeugmaschinen Fabrik (BWF), we can now look back on nearly 45 years of experience in grinding machine construction.

At our headquarters in Seefeld near Berlin, we have established ourselves as a medium-sized company with regular customers worldwide.

We manufacture individual machines for your grinding tasks. We also offer our clients construction and modernization / retrofit of cylindrical grinding machines for the antifriction bearing and automotive industries and for the general mechanical engineering.

The enterprise WWF GmbH from Germany is a well-known address for progress and technology of future.

Technical challenges are solved through the production of innovative products, through an outstanding service and through an excellent cooperation with the customers.

### Sector: Maschinenbau

### Products and Services:

We manufacture high-precision machines in the field of cylindrical grinding. The spectrum includes rolling bearing machines, internal and external cylindrical grinding machines and centerless grinding machines. In addition to building new machines, our specialization lies in a CE-compliant retrofit of your "old" machine.

### Typical Clients:

SKF, VW AG, ZF AG, GKN, KRW Leipzig, Linamar,
