

Presents

Post stamps

and administrative stamps

INTRODUCTION

- We would like to introduce you to printing house Blicdruk, which specializes in printing postage stamps and administrative stamps

- Blicdruk printing house is a family business, located in the center of Sarajevo, employs a permanent staff of twenty and has existed successfully for 25 years.
- It is equipped with modern technology for the pre-press, press and post-press of postage stamps and administrative stamps.

- Each of these three particular segments of production has security levels.
- The printing process strictly follows the highest level security protocols regarding the input and output of content, all phases of the production of stamps and the transfer of goods

- All printing processes, as well as everything that comes and leaves the printing house, including all materials and people, are monitored by video control systems.

TECHNICAL INFORMATION

- For production we use modern thermal CTP of high resolution with frequent modular (FM) raster.

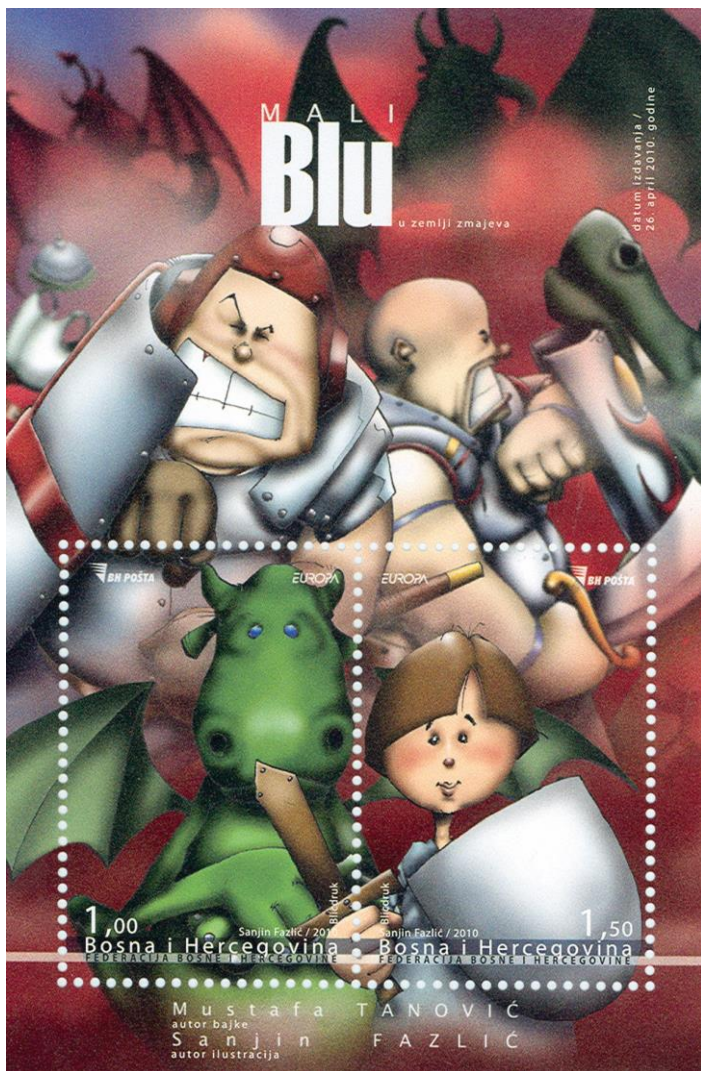

- Printing is carried out on a five color Heidelberg Speedmaster (new generation) of high performance and capable of producing the finest printing, exactly what is needed when printing postage stamps.

- Finally, and very importantly, the final element of production is the perforation of postage and official stamps.

- The machine that is used for the perforation is a 'Wista' machine from the renowned German manufacturer, the leader in the production of perforation machines and tools for perforation.

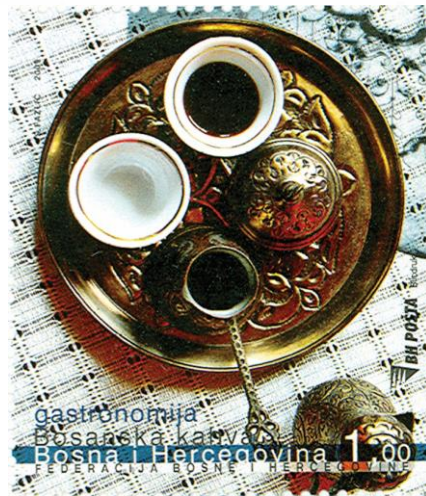

- We are proud to present you our printing process, and we look forward to doing business with you to our mutual benefit, and the start of a long and successfull business relationship.

- This is very short presentation of printing house Blicdruk and for more information please visit our website www.blicdruk.ba

Thank you for your attention
